Two independent cooling No Frost systems create the ideal frost-free environment for food preservation, ensuring the ideal temperature and humidity and avoiding odors mixing between the cavities. Place fruit and veggies anywhere in the fridge, Dual No Frost keeps them fresh up to 15 days

Never defrost again. No ice drops in the fridge
This system avoids the formation of frost inside the freezer, preventing food from sticking together and sparing you from manual defrost

NoFrost technology to avoid frost formation in the freezer

New freeze technology to reduce frost in the freezer. Thanks to the evaporator wrapped around the freezer cavity, and not in between the drawers, frost formation will be drastically reduced
